

Wavecon Telecom Analysis

- WaveCon Telecom is a fast-growing telecommunications company, recognized for delivering cutting-edge connectivity solutions across India. With a focus on bridging digital gaps, WaveCon has built a strong reputation by providing reliable services to diverse urban and rural markets. The company's recent launch of 5G technology marks a major step toward revolutionizing internet speed and network performance. By continuously investing in innovation, WaveCon is shaping the future of communication and empowering users with seamless digital experiences.
- WaveCon Telecom stands as a dynamic force in India's telecommunications landscape, driving innovation in digital connectivity. With a strong footprint across metropolitan and rural regions, WaveCon has earned customer trust through dependable and future-ready service solutions. Pioneering the next era of connectivity, WaveCon recently introduced its advanced 5G services, enhancing speed, reliability, and digital experiences for businesses and consumers alike. This major leap highlights the company's dedication to reshaping how India connects and communicates. Focused on next-generation technologies, WaveCon continues to evolve rapidly, delivering cutting-edge network solutions and redefining user experiences in a fast-changing digital world.

Questions:

- 1.What is the impact of the 5G launch on our revenue?
- 2.Which KPI is underperforming after the 5G launch?
- 3.After the 5G launch, which plans are performing well in terms of revenue? Which plans are not performing well?
- 4.Is there any plan affected largely by the 5G launch? Should we continue or discontinue that plan?
- 5.Is there any plan that is discontinued after the 5G launch? What is the reason for it?

Q1:- What is the impact of the 5G launch on our revenue?

Overall Impact:

After the 5G launch, the **total revenue decreased slightly by -0.50%.**

- **Before 5G Revenue:** ₹ 16.0 billion
- **After 5G Revenue:** ₹ 15.9 billion
- **Change:** -₹ 0.1 billion (a small decline)

City-wise Impact:

- Some cities like **Lucknow, Gurgaon, and Patna, Raipur, Jaipur** experienced slight **growth** post-5G.
- Other cities like **Ahmedabad, Chennai, and Delhi** showed a **decline** in revenue after 5G.

Monthly Trend:

- Revenue initially **increased in February**, but then **flattened or slightly dropped** in later months (March to September).

Conclusion:

The launch of 5G did not result in an immediate revenue boost. Instead, there was a **minor decline of 0.50%**, indicating either:

- A slower customer adoption of 5G plans
- Or possible price competition and promotional offers post-launch that impacted revenue.

Q2:- Which KPI is underperforming after the 5G launch?

Underperforming KPI: Revenue, TAU, TUsU

Revenue is underperforming after the 5G launch.

- **Before 5G Revenue:** ₹ 16.0 billion
- **After 5G Revenue:** ₹ 15.9 billion
- **Revenue Change:** -0.50% (decline)

● Total Active Users (TAU)

Before 5G: **84.4M** users

After 5G: **77.4M** users

Change: **-8.28%** (decline)

● Total Unsubscribed Users (TUsU)

TUsU is underperforming because a **higher number of customer unsubscriptions** after the 5G launch shows **customer dissatisfaction or poor retention**.

Ideally, after a major upgrade like 5G, the company should **retain more users**, not lose them.

A rise in unsubscribed users negatively impacts revenue, market share, and brand loyalty – making it a **key underperforming KPI**.

Q3:- After the 5G launch, which plans are performing well in terms of revenue? Which plans are not performing well?

💰 Top Performing Plan – P1

- ✓ p1 has the highest total revenue among all plans.
- ✓ Its revenue increased after the introduction of 5G, indicating adaptability and popularity.
- ✓ Consistent high monthly revenue compared to other plans.
- ✓ Strong performance across top cities, contributing significantly to its success.

Plans Underperforming After 5G Launch

- Plans **p5, p6, and p7** experienced a significant drop in revenue after the 5G launch.
- **p5** (Full Talktime Combo Pack) saw revenue decline from ₹1.0bn to ₹651.5M.
- **p6** (15GB Mobile Data Pack) dropped from ₹749.1M to ₹494.6M.
- **p7** (25GB 3G/4G Data Pack) fell sharply from ₹582.4M to ₹155.6M.
- These plans struggled to retain customers, likely due to outdated offerings compared to 5G-enabled packs.
- Indicates a **shift in consumer preference** towards 5G-ready and higher data plans.

Q4:- Is there any plan affected largely by the 5G launch? Should we continue or discontinue that plan?

Plan p7 – 25 GB Combo 3G / 4G Data Pack

- **Total Revenue: ₹738M**
- **Revenue Before 5G: ₹582.4M**
- **Revenue After 5G: ₹155.6M**
-  **73% revenue drop after 5G launch**
- Revenue consistently declined from July to September, signaling loss of customer interest.

 **Recommendation:**
Discontinue Plan p7
Due to a **significant decline in post-5G revenue** and customer shift toward 5G-compatible plans, continuing this legacy 3G/4G plan is **not financially viable**.

Q5:- Is there any plan that is discontinued after the 5G launch? What is the reason for it?

Key Insight

- Post-5G launch, **shifting user behavior and evolving data needs** led to the **discontinuation of short-term, low-value plans.**

Discontinued Plans & Reasons

Plan p8 – Daily Saviour

- **1 GB/day | 1-Day Validity**
-  *Too short and inflexible* for evolving user preferences

	Daily Saviour (1 GB / Day) validity: 1 Day		
	434.3M	434.3M	NA
	Total Revenue	Revenue - Before 5G	Revenue - After 5G

Plan p9 – Combo Top-Up

- ₹14.95 Talktime + 300 MB Data
-  *Low demand* due to limited data and minimal value

	Combo TopUp: 14.95 Talktime and 300 MB data		
	226.8M	226.8M	NA
	Total Revenue	Revenue - Before 5G	Revenue - After 5G

Plan p10 – Big Combo Pack

- 6 GB/day | 3-Day Validity
-  *High data, but short duration* made it unattractive

	Big Combo Pack (6 GB / Day) validity: 3 Days		
	131.1M	131.1M	NA
	Total Revenue	Revenue - Before 5G	Revenue - After 5G

Conclusion

There's a **clear user shift toward long-validity, high-speed, and data-rich plans.**
Post-5G, **users prioritize value and stability** over quick-fix packs.
